PROFESSIONAL SUMMARY

Aspiring Full Stack Web Developer with a strong foundation in modern web development and backend systems. Experienced in building real world applications with clean architecture and scalable features. Passionate about problem solving, having solved 300+ LeetCode questions (1550+ rating) and achieving 1100+ on Codeforces. Driven to contribute to impactful engineering teams building scalable systems and real world applications, while growing into a well rounded software developer.

EDUCATION

Bachelor of Technology (Data Science)

Newton School of Technology, Rishihood University

2024 - 2025

Grade: 8.913/10.0

Intermediate (Class XII)

Little Flower Hr. Sec. School

2023 - 2024

Grade: 98.0%

Matriculation (Class X)

St. Francis Hr. Sec. School

2021 - 2022

Grade: 93.8%

PROJECTS

DineX ([Github](#)) ([Demo](#))

October 2025

Summary: End to end restaurant management platform focused on real time table handling, order flow, and staff operations, with an integrated customer portal for discovery and reservations supporting daily restaurant operations at scale.

Impact:

- Built a **real time restaurant operations system** with table status tracking, reducing manual coordination.
- Developed a **order management workflow** for waiters allowing table opening, item modification and order tracking.
- Implemented **role based authentication** for admin and waiter, improving access control and operational clarity.
- Designed a **centralized order pipeline** using Express and MongoDB to synchronize updates across waiters and kitchen.
- Created a **responsive, mobile friendly UI** optimized for on floor restaurant usage across different screen sizes.
- Developed a lightweight **customer portal** for browsing restaurants, viewing menus and reserving tables online.

Travel Canvas ([Github](#)) ([Demo](#))

April 2025

Summary: A full featured **online design editor** enabling users to create personalized travel themed visuals with an intuitive Canva like interface focused on real time smooth editing, customization and high quality exports for users.

Impact:

- Built a **real time text editing module** with optimized renders using **debouncing**, resulting in **smoother editing**.
- Implemented **image upload and manipulation tools**, supporting large file handling with efficient processing.
- Added **high quality export functionality (PNG/PDF)** with canvas rendering, enabling users to download designs.

SKILLS

Computer Languages: Python, JavaScript, CSS, HTML

Software Packages: MongoDB, MySQL, Express JS, Tailwind CSS, Next.js

Additional Courses: Data Structure

EXTRA-CURRICULAR ACTIVITIES

- Applied analytical thinking in coding challenges and projects, using creative approaches to optimize solutions.
- Collaborated in multi role project teams, sharing responsibilities, coordinating tasks, and maintaining clear communication across team members to ensure timely and efficient delivery of project milestones successfully.
- Led small project groups by organizing tasks, guiding peers, and resolving blockers to keep development on track.
- Communicated technical concepts clearly through presentations and documentation, supporting knowledge sharing.
